OneHome™ EdgeBricks Introduced by HomeLogic

Marblehead, MA September 1, 2004 HomeLogic, LLC introduces the **OneHome™** EdgeBrick family for home systems networking and control.

The **EdgeBrick** technology is a set of solutions designed to deliver the feature-rich control capabilities of the whole-house **OneHome** Management and Control solution but dedicated to a single in-home sub-system. Software features include the Home Tab and the sub-system management and control Tab inclusive of scheduling and history functions.

"The new **EdgeBrick** family of embedded controllers enables installers and builders to offer the easy-to-learn and easy-to-use **OneHome** user interface for a single sub-system, such as Climate or Lighting, at a fraction of the cost of whole-home automation," stated Jim Herman, HomeLogic co-founder. "Users have the ability to connect to the **EdgeBrick** by way of their home computer network. They may also incorporate touch screen (in-wall or wireless) devices as well as PocketPC technology in order to access and control the sub-system. Remote access is possible via connection to the Internet through HomeLogic's website."

The new **EdgeBrick** comes with ports enabling it to connect to an Ethernet home network as well as to the serial-based or power line control (PLC) sub-systems. Software for the specific sub-system, including the ability to integrate with the various compatible sub-system manufacturers, comes installed on each **EdgeBrick**, ready for the installer to configure for the specific homeowner's sub-system. Its compact size facilitates installation in a variety of locations within the homeowner's residence.

Initial versions of the **EdgeBrick** include technology for controlling climate or lighting sub-systems. During the next several months, HomeLogic plans to make available systems for controlling security, irrigation, and other in-home sub-systems. These will provide many options for homeowners and installers alike. "You can start enjoying these high-end features with a minimal investment and grow in a modular fashion. If and when the customer is ready for more extensive solutions that include distributed audio or video, there's even an upgrade path we'll offer," added Joe Lautner, VP Marketing and Sales.

The new **EdgeBrick** solutions for climate and lighting are available today for immediate shipping. Please visit www.homelogic.com to learn more about growing your business with **OneHome™** solutions.

About HomeLogic

HomeLogic is dedicated to delivering market leading home management and control solutions that enhance a home owner's comfort, convenience and peace-of-mind. We offer a turn-key solution which requires no custom programming, simplifying the selection and installation process as well as lowering the overall cost to homeowners.

To learn more about the HomeLogic and our **OneHome** solution, contact Joe Lautner at (781) 639-5155 x1214, or visit us on the Web at www.homelogic.com.
